

Aircode™ and Aquacode™ technology launched at COOP

COOP has now completed eight months of performance testing with Mateseco products Aircode™ and Aquacode™, with an emphasis in the can/bottle recycling and refuse areas showing outstanding results. The products will now move into the internal marketing stage for COOP.

Aircode™

With Aircode™ technology it creates an environmentally friendly and energy efficient indoor environment with clean air, free from odours, bacteria, mould spores and particles. Aircode™ will improve the environment for both employees and customers with fresher air in the shop and a better working environment with odour and germ-free garbage and bottle recycling room. Furthermore, there are more potential profits with Aircode™, in areas such as shopping baskets and shopping carts, the install of Aircode will minimize the potential of bacteria and virus build up which is a customer request today. With a better indoor climate free from bacteria, particles and mould the power consumption in storage, radiator and similar spaces could also be reduced. Whatever the application field Aircode™ has solutions that purify the air in an environmentally and cost effective manner.

Aircode™ handles

Odours, bacteria and particle scattering, which can be a problem in the following areas.

- Bottle recycling areas
- Garbage / container room / compactors
- Toilets
- Refrigerated Counters / cold room
- Meat and fish processing
- Shopping baskets and carts
- Restaurant Divisions

Aquacode™

Aquacode™ technology can be used for fast and efficient cleaning service to immediately eliminate odours and bacteria in vulnerable areas such as bottle recycling stations and fresh food handling. The technique is effective against bacteria, biofilms, viruses, algae, fungal spores and moulds.

Aquacode™ dosage

- Disinfection of bench space and food utensil 50-100%
- Floor cleaning 20-50%

Supplied in packaging volumes 1,5 and 25L.

Quotes / references

“Very good system, fresh smell in the recycling areas. We can recommend the air cleaners.”

*Christer Hedin, Store manager
Coop Forum Vasteras*

“The best with the air cleaners is that we no longer have odor, either in the customer lobby or in our recycling areas. A good investment for both staff and client health.”

*Hanna Hanell, Store manager
Coop Forum Enkoping*

Aircode™ CX-200

A freestanding, stainless unit for easy installed in the ceiling or on the wall with four screw and a plug. CX-200 creates a fresher climate in waste disposal rooms, bottle recycling room, changing rooms and in other enclosed areas.

Aircode™ CX-600

The CX-600 has the same function as above, but can cover larger areas with a higher odour or particulate levels.

Aircode™ IDAC-500

The unit is suitable for both new installations and for after mounting in fixed ventilation. Mounts easy for maximum effect across larger areas and with minimal servicing.
